

DXC Managed Services for Microsoft Azure VMware

Take advantage of the cloud-computing revolution — our automated, flexible, integrated data-migration solution lets you modernize mission-critical systems, shore up security needs, better serve customers and boost your bottom line.

Unlock innovation with a powerhouse partnership from DXC and Microsoft

Smart organizational leaders know their customers, personnel and balance sheets benefit when workloads move to the more secure, scalable cloud. However, there is concern that the time and resource costs of such transitions outweigh the benefits.

Enter the DXC Managed Services for Microsoft Azure VMware Solution. This offering scales according to your budget and your IT needs. With the powerhouse partnership from DXC and Microsoft, you get expertly managed private cloud services from DXC and the flexibility and scalability of Microsoft Azure VMware.

We migrate and extend your on-premises VMware vSphere-based environments to the Microsoft Azure VMware Solution. Benefits include:

- **Quick deployment.** Deploy rapidly to VMware cloud clusters hosted by Azure data centers by taking advantage of our solution's customizable cloud templates that draw from vRealize Automation (vRA) and DXC's orchestration and automation library.
- **Tailored services.** Choose the services you need from ServiceNow, vRA or API catalogs or our Enterprise IT Service Management portal. You can also receive application support in DevSecOps, continuous integration/continuous delivery (CI/CD), day 2 operations and Infrastructure as Code.
- **Full cloud support.** Access the full suite of Microsoft Azure cloud services, including architecture, design, migration, delivery and continuous operational support in areas such as storage, virtual network, and security and financial management.
- **End-to-end managed services.** Get end-to-end managed services support through Platform X™, our automated service-delivery model. The platform allows for full-stack capabilities, including infrastructure support, monitoring and automated patching.

Key benefits

- **Go faster.** Deploy rapidly by migrating to a consistent infrastructure delivered as a service.
- **Reduce risks.** Keep threats at bay by moving to a secure platform with built-in security updates.
- **Gain expertise.** Drive business value with unparalleled advice in areas such as cloud migration of critical workloads, application development and trend analyses.

DXC Managed Services for Microsoft Azure VMware Solution in Action

Here's some of what to expect from the solution:

- **More innovation.** Move to our future-ready cloud architecture — with efficiencies in operations, policies, skills and tools — and you're ready to innovate for what's next. After migrating existing applications, turn to long-planned modernization strategies, including born-in-the-cloud applications, traditional applications and eventual elimination of "Mode 1" workloads.
- **Reduced or eliminated capital costs.** Consolidate or even close down data centers by moving completely to the public cloud, and reinvest or recover the cost savings.
- **Ability to improve business processes.** By moving to the cloud, you unleash your organization's ability to improve business processes and make sure both customers and personnel can conduct transactions as seamlessly as possible. You are also better able to future-proof and centralize your IT investments.

DXC Managed Services for Microsoft Azure VMware Solution: Power of Partnership

With the DXC Managed Services for Microsoft Azure VMware Solution, you benefit from a longstanding industry partnership. DXC is an internationally recognized Microsoft partner, its largest IT services partner globally and one of the first firms to certify as a Microsoft Expert MSP.
